Summary

Frontend and backend developer focused on automation and integrations. Built and operated client apps and business-critical infrastructure.

Skills

- TypeScript
- Docker
- Kubernetes
- PostgreSQL

Professional Experience

Founder / Product Engineer / Systems Lead

Technomancy IT LLC

Present

- Built client applications and integrations as founder of Technomancy IT.
- Built client-facing support and CRM workflows with APIs and tenant-aware access controls.

Senior Systems Engineer / Datacenter Architect

Front Range Internet Inc.

2015 - 2020

- Led NOC escalations and recovery verification for business-critical systems.
- Migrated workloads from Hyper-V and VMware ESXi to Docker and Kubernetes.

Systems / Software Engineer

Office Evolution

2014 - 2015

- Built onboarding automation and connected CRM and operational data to simplify provisioning.

Network & Systems Engineer

PlumChoice / Everon

2012 - 2014

- Troubleshot business networks and endpoints for managed-services clients using remote monitoring and repeatable diagnostic tools.

Infrastructure and Systems Focal

IBM

2010 - 2012

- Automated audits and backups, and tested virtualized environments for support teams.

Selected Projects

ProofMark

Client engineering

Contribution completed

- Designed a document-signing workflow that joins identity, routing, audit history and verification, with explicit fallback paths for security-sensitive state.

Radar sensing infrastructure

Technomancy IT client project

Long - term engagement

- Provided full-stack engineering and DevOps support for a data-science team developing a contactless radar device. Set up and supported the systems the team used.

Education

Front Range Community College

Computer Science coursework

2011 - 2013
